

Transform. Implement. Deliver.

Driving measurable outcomes through SAP implementation and business process transformation.

From strategy to impact: Driving business transformation with SAP

Is your business aligned with your profit goals?

Are there opportunities to increase throughput or unlock additional capacity?

How effectively is demand being synchronised with supply during planning?

Is there potential to optimise working capital and enhance inventory management across the value chain?

Are there opportunities to improve declining operational metrics?

How can delivery compliance and On-Time In-Full (OTIF) performance be strengthened?

Are rising costs in certain areas signalling a need for deeper analysis and control?

Unlock operational excellence with SAP-led transformation

Are high inventory levels, manual workflows, and long turnaround times slowing your business down?

We help organisations overcome these bottlenecks by streamlining end-to-end operations through SAP-led transformation.

Value delivered

With our experience in a value-driven implementation approach, we deliver tangible business outcomes that drive substantial ROI from SAP implementations. Key measurable results include:

10-15%

improvement in fill rates

8-10%

efficiency improvement

15-20%

reduction in working capital

6-8%

improvement in process throughout

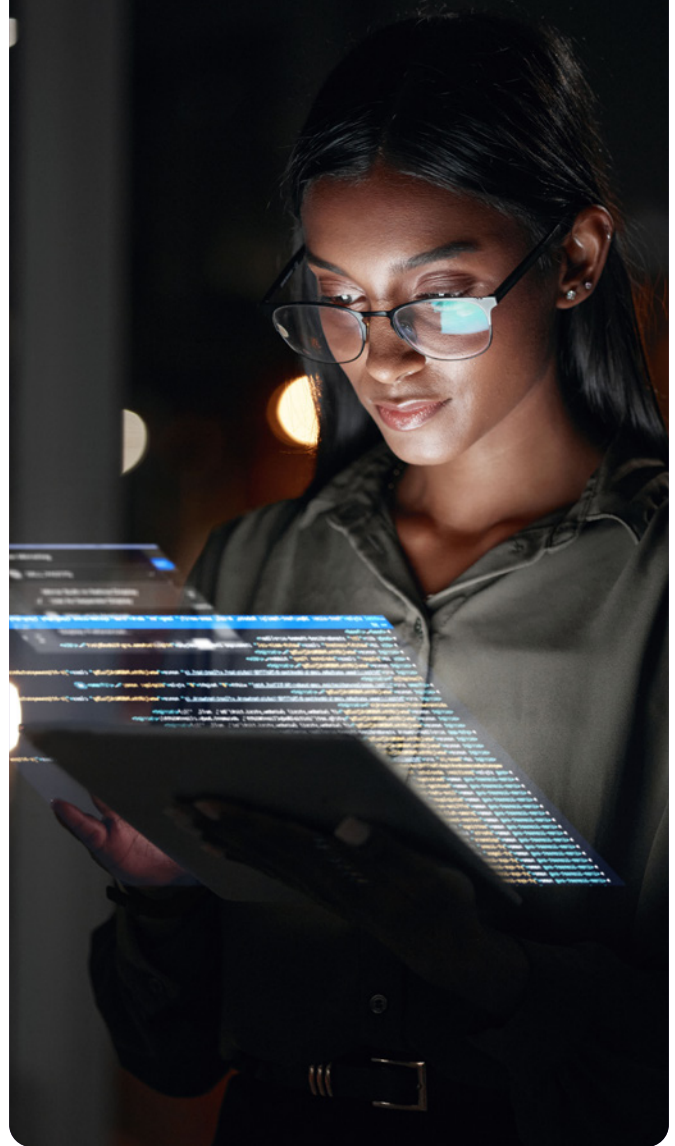

From challenges to measurable performance improvements

We take a comprehensive approach to operations by identifying underlying issues, removing unnecessary steps, and digitising workflows with automation, real-time insights, and strong governance. Our modular SAP-led method replaces fragmented processes with a unified, flexible system—resulting in 5–10% efficiency improvements, up to 20% faster cycle times, and sustained productivity gains. The outcome is a structured transformation that delivers clear, measurable results.

Critical technology issues we help overcome

Beyond business performance, we address key technology-driven challenges to maximise SAP ROI:

- How can new SAP capabilities be leveraged to enhance performance across the value chain?
- How do we ensure measurable ROI from SAP investments?
- How can SAP be used to effectively track and measure performance across functions?

Our implementation approach

It involves systematic interventions across processes, systems, and structures, using the SAP platform to drive results. Our approach includes:

Identifying process inefficiencies:

We identify and optimise areas where processes are inefficient, redundant, or outdated, allowing for targeted improvements before SAP implementation.

Streamlining workflows:

We redesign workflows and reconfigure business rules to increase efficiency, reduce time and costs, and improve overall operational effectiveness.

Eliminating bottlenecks:

We identify and remove bottlenecks in the workflow to enable smoother and faster process execution.

Improving data quality:

We focus on identifying and addressing data quality issues in existing processes, ensuring that the SAP system is populated with clean and accurate data.

Aligning with SAP capabilities:

We align business processes with the capabilities of the SAP system, maximising its potential and reducing the risk of underutilisation.

By understanding existing processes and identifying opportunities for improvement, BPT prepares the organisation for a more successful ERP implementation.

Our advisory solutions in India

We help clients protect, improve, and maximise their investments in technology by guiding them towards the right solutions to efficiently optimise their business through best practices, digitisation, automation, and cost optimisation.

Credentials

SAP Gold Partner

Industry experience – Energy, automotive, consumer goods, metal & mining, real estate, EPC, retail, oil and gas, pharmaceuticals and chemical

Certified expertise

- Certified in the latest offerings by SAP
- Extensive experience in both domestic and international markets
- Combined expertise across industries such as pharma, retail, energy, consumer goods, and more

SAP SuccessFactors Offerings

- Core HR
 - Recruiting
 - Onboarding
 - Performance and goals
 - Growth and succession planning
 - Compensation
 - Learning
- Workforce planning and analytics
- Employee experience management

Focus areas

Implementation

Rise with SAP S/4HANA, Grow with SAP S/4HANA, PPDS, DDMRP, GRC Successfactors and Ariba

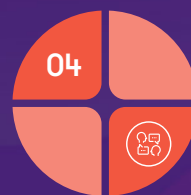

Assessment

Process, system, access controls

Work package

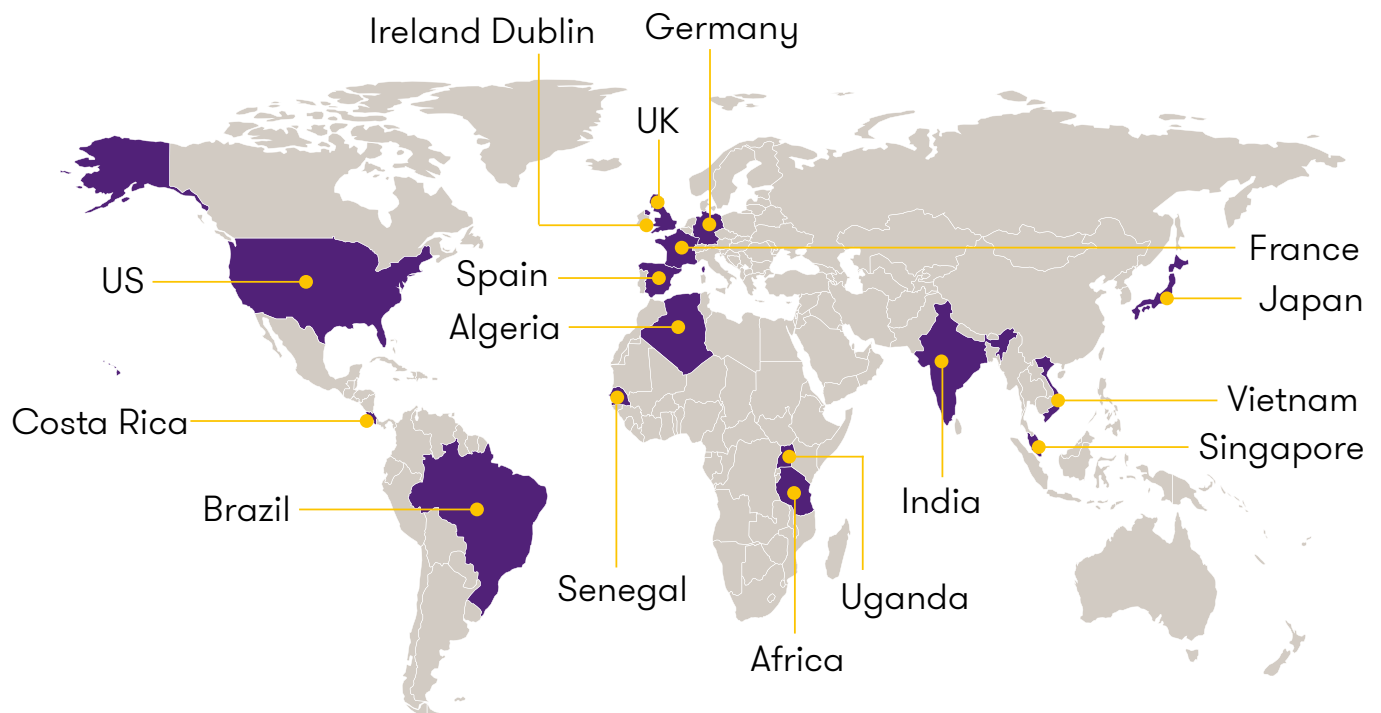

ABAP, FIORI, BTP, UI5, SAC, SAP BW, CPI

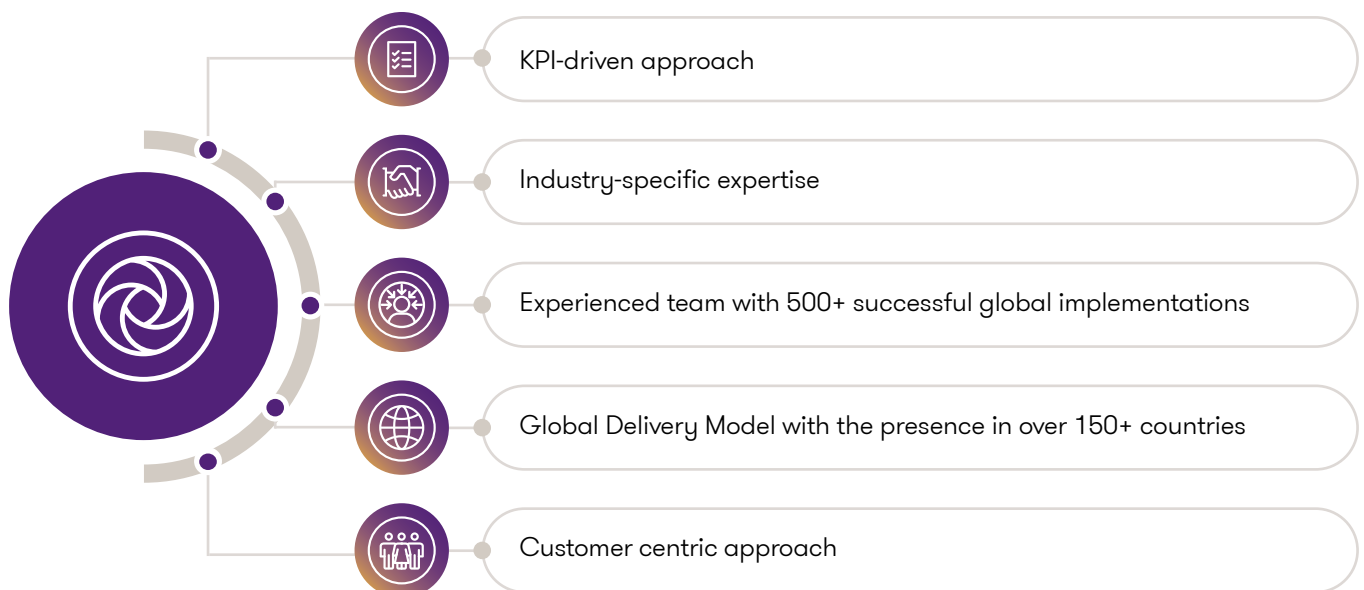

AMS

Offshore, onsite support, process optimisation

Our advisory solutions: Global footprint
