

Supporting businesses with skilled professionals

Is your organisation facing a resource crunch for skilled finance professionals in order to meet the business requirement on an immediate basis? We have solution for you that will allow timely replacement of human resources and ensure adequate resources for management of finance operations. Our interim CFO and financial controller support services helps organisations to meet the business vision and allow them to focus on core business operations through access to our trained accounting and reporting professionals. We can support the CFO for various support functions under 'play and plug' model.

You can benefit with

Access to expertise

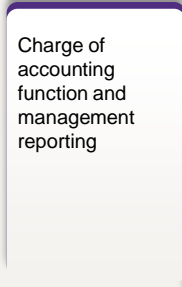

Improved focus on core business

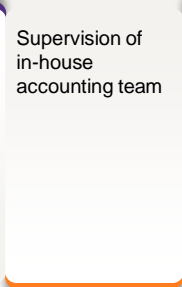

Better control over operations

Our services

Charge of accounting function and management reporting

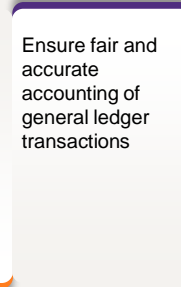

Supervision of in-house accounting team

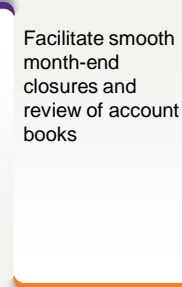

Review of budgets versus actual reports and reporting on exceptions

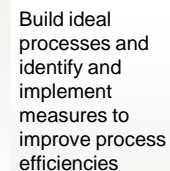

Manage reporting on financial performance with review of MIS, monthly accrual report, revenue recognition to ensure accuracy and completeness

Ensure fair and accurate accounting of general ledger transactions

Facilitate smooth month-end closures and review of account books

Build ideal processes and identify and implement measures to improve process efficiencies
